ATOM

Britain Searching For Frightful War Weapon

London, June 13.

Researches into two new forms of warfare. probably more deadly than the atom bomb, are now taking place in Britain. They are the radioactive "cloud" and the bacteriological bomb.

Bacteriological research is taking place at a special station in Southern England where nearly 200 technicians are employed.

Well-informed sources in London, giving this information today, said that the United States now has a small number of bacteriological bombs ready. These are in addition to the new type of atomic bombs in storebelieved to be more than 100.

Chalk River. Canada, could, it is Weapons Organisation. assumed, provide the deadly Observers here begin to see in radioactive substances needed for these developments what might be "atomic cloud" warfare. These a new conception of British global substances are available in the discharges from atomic piles which produce the "ingredients" for the

Another source of these radioactive substances is the British Atomic. Energy establishment at Harwell, Berkshire.

Professor J. D. Cockroft, head of the British atomic energy project hinted significantly at this source when he said recently: "We shall have to solve the problem of disposal of radioactive products which in very large intensities.

"These products can be a serious danger to health if they are dispersed in a concentrated form.".

dorce of the rocket. Only small ex- informed observers here say.

The atomic energy plant at Evitis, known as Long-Range

The vulnerability of Britain in the event of another war and the need atomic energy already working for the dispersal of her major industries is in fact the key to this new plan, under which each Dominion is to be encouraged to develop one sphere of activity to fit into the strategic scheme.

Australia already has a rocket range and is carmarked for fullscale researches into guided projectiles. Canada is believed to be the proposed base for the atomic section. The setting up of an atomic in the frozen wastes would be produced as a byproduct where experiments with radioactive "clouds" could be carried out in safety is forecast within the near future.

Campbell Postpones Attempt On Record

Lake Coniston, June 13. Sir Malcolm Campbell nounced late today that he would send his jet-propelled boat. Bluebird III. back to Porchester for modifications, thus ending his present attempts to smash his own world's record. The announcement followed two trials last night and today, in which the craft shook slightly before reaching the speed of 100 miles per hour. Sir Malcolm told a press conference he planned to return to Coniston in a month for another record attempt. He said that at present the bont's lateral stability was wrong.

STILL DETERMINED "It is a question of aerodynamics and hydrodynamics," he said. "I can

assure you I am more determined than I ever was before." Modifications will be done Foster's yard in Porchester, wher the craft was originally designed. Sir Malcolm disclosed that the NORTHERN IRELAND highest speed reached in the two

tests was between 100 and 110 miles Conditions for today's test were virtually ideal-even better than last night when he flew at 90 m.p.h.

over the flat blue waters. Sir Malcolm called a halt after quarter of a mile today and informed mechanic's: "I had reached nearly 10,000 revolutions when the shaking developed. It was so bad that it was no use carrying on."

BOAT HAS "BUGS" He said the boat had plenty of "bugs" which needed ironing out one

"At the moment none of us know quite what is the matter," Sir Malcolm said. "Without. adjustments it would not be safe to go at high speed with the present tendency to shake. There is nothing sensationally wrong.

EDITORIAL

Hongkong Hawkers

NEARLY two months have pass-ed since the Committee on Hawking submitted its recom-mendations, but there are no signs that the authorities intend to put any of them into effect. Meanwhile the hawker problem, with its many vicious features, grows more difficult in the face of punitive raids by the police. The commilitor's findings made so much sense that Government would only have acted in accordance with popular convictions if it had immediately started to implement them. The main recommendations, forming part of a shortterm policy are (a) establishment of hawkers' markets in certain streets and open spaces to accommodate between ten and fifteen thousand hawkers; (b) encouragement of private hawkers' markets leading to the provision of additional space if required; (c) crection of concrete food stalls to an approved hygienic pattern; (d) the institution of a new type of licence to be styled the Pedlars Licence; (c) publicity for any measures which it is proposed to adopt. As nothing hos been issued under the fifth heading presumably 'no decision has been reached about adopting any of the committee's report. It has been agreed, in principle, that control of hawkers is essential if only to reduce the risks of spreading

disease and to keep main streets clear. Less publicised but equally obnoxious considerations are the rackets which have become by-products of the existing situation. .. Police 'protection' is still rampant; has, in fact become intensified because of the increased possibility of police raids, Additionally, the reputable hawkers as well as their millocased competitors are being daily victimised by gangs of children who operate on behalf of so-called guilds and unions. They are blackmallers. pure and simple, and often make exorbitant demands on the hapless hawkers. Failure to meet the terms of these stooging extertioners brings, threats of strongarmed reprisals which the gangs are quite willing to use. Police claim a certain degree of success for their punitive-measures campaign, but they are only of a temporary nature and cannot provide a solution to the problem, even assuming the methods employed are desirable. The hawker question has to be treated on a wide, but rational basis. Comprehensive action of a constructive nature is required, and the recommendations of the Committee on Hawkers go nearer to fulfilling these conditions than any other set of proposals yet advanced. Government should hesitate no longer in putting the findings into

Players Stake Claims For Test Honours With Good Performances

London, June 13. With changes likely to be made in England's team, which is being chosen on Sunday, to meet South Africa in the second Test beginning at Lords on June 21, several players with chances of inclusion staked their claims with good performances in matches just finished.

The most pleasing of all was the that he actually played. Brierley's welcome return to form of the Kent | 116 not out in 190 minutes, includsomething entirely new (the Blue- spinner, Douglas Wright, who was ing 13 fours, was his first century bird is the first jet-propelled boat in relegated to "drink carrier" for the for Lancashire since joining the first Test. Operating on a batsman's county last season, strangely enough wicket against Northamptonshire ha from Glamorgan for whom his highturned the wall well and finished est score in firstelass matches was with eleven wickels for 157. He 116 against Lancashire in 1938. and Leslie Ames, former : England wicket-keeper, were big factors in Kent's nine wickets victory. Ames' first innings century, with five not hit in two hours by-Wilfred Wooller, out in the second innings, brought Lancashire's bid for victory at

> Jack Robertson, who made Middlesex history by helping Brown in a record opening partnership of 310, has been on the fringe of Test honours since last season. His brilliant cipally with square cuts and leg 183 may sway the selectors to take the course suggested by many crities to include him lower down to strengthen the England batting.

ANOTHER POSSIBLE

who toured Australia with the English team but was not-retained for the Test against South, Africa at Trent Bridge, is again being spoken of as a Test possible. He made an effort to catch the eye of the selectors again with a grand 72 against Glamorgan. He was heading confidently for his first 'County champlouship century and was unfortunate to be out less before to a ball

Rita

Hayworth

-who seems to be finding that Paris is tough going

ERNEST BETTS writes: In a room at the totel George V., full of tulips and roses, I spent an hour and a quarter this afternoon with Rita Hayworth, top show personality of the moment in Paris.

She was wearing the smart grey suit she word in her last film, "Gilda." Hotel quests unknown to her rapped on the door, telephones rang and letters poured in from fans and friends.

But Rita, who was severely mobbed on. arrival at the Gare du Nord, and has been severely photographed since, has ducked. Paris crowds for a time. She has a view about this, about clothes, about people . . . here it is :-

EING in Paris has made me nervous. Everyone is kind, everyone is excited, and people are always wanting to be friends. But it is different being a star in Paris from being one in America, and I am afraid it has got me down. I have had to shut myself up in my room, like Garbo.

What do I think of Paris? Why they have no reason to be. They of course I think of clothes, because know how to act and they have good that is what you come to Paris for. looks too. On the screen it is not In films you must not only know your eyes, your hair, your figure that what to wear, but how to wear it. counts. It is the whole impression. My advice to any girl thinking of It's the line, as in clothes, if you clothes is to go in for the simple line get me. which is flattering to the wearer. The materials are less important than the line. And no fuss, if you get me. The same goes for hats. In pictures it is rather different.
You must wear the suit that is comfortable and appropriate to the scene, particularly because you may be filming in the same costume for a long time, and it may have to be a bit more showy than the dress you wear in the street.

AM in Parls for a hollday—that is, I thought I was. But I was soon disillusioned. I seem to have done nothing but pose in the Place Vendome or before Notre Dame, and sign autographs.

And after that reception at my hotel, which lasted for about three hours with 300 people, and was like n Hollywood premiere, but more difficult, I felt "all in." You see, it is different from America, where you know everybody. I ought to be used to it—it is wonderful to be seen and appreciated—but it is my first trip to Europe and it is hard to size it all up. It is really a strain. Besides, I have been working pretty hard these last few years, finishing one picture and then, the

following week, going straight into In Hollywood you work regularly, its you know, in minutes by the clock Rhythm," which opens at -and all round the clock. In most of my pictures I have to dance, and this means rehearsing the film for a nine in the morning till 5.30 at night. where, at seven or eight in morning. It looks carefree and good on the screen, but, it is hard work

I came over here in a slow Dutch ham, Arthur Treacher, Walter although the show does go on, boat just to get a little sleep, and Catlett, Sterling Holloway and the stupendously, it was so rough coming over that Golden Gate Quartette. the dinner table in my state room was flung to the floor three times. Well, I thought, I can sleep in Paris, but that has been impossible.

I want to see Paris and I have been around to a few places, just like any tourist, but whenever I pop out of my hotel, there they are, all the people who seem to know me, yet only two of my pictures have been shown here.

IN Hollywood I have met many of l your stars. Roland Culver was in my last picture, "Down to Earth" (not seen in London yet)-and what a fine actor he is. And Deborah Kerr—she is a real person all right, she has a lot of charm—she impressed everybody.

They tell me your stars feel nervous about making pictures in Hollywood. Why? They are wonderfully good at their job. What has Ann Todd to be airald of, I won-

· But perhaps it is all talk. I do not believe they are really worried about filming with us. Anyway,

Adult Theme In "Bambi"

The theme of Walt Disney's new production, "Bambi," is strictly adult, and its situations are the emotional ones which confront

grown-up men and women.
Felix Salten wrote the best-selling novel on which the picture is based, telling in terms of appealing animal characters living in the Vienna Wald a story which is a life cycle of birth, growth, love, parenthood, tragedy

and triumph. Of course, "Bambi" has its lighter moments, as witness the famous "twitterpated" sequence, probably the most hilarious tomboolery Dis-

ney has ever created. The picture filmed in Technicolour and rich music, is showing at "the Queen's Theatre.

Old age wasn't easy for Margaret

THERE is a good reason for the making of "Hungry Hill," showing at the Lee Theatre. It is faithfully adapted from a worthy and popular novel by Miss Daphne du Maurier. Enough people have read the book to ensure a faithful following for the screen ver-

Therefore all the producer, Mr Del Giudice, and the director, Mr Brian Desmond Hurst, have to worry about is that their visual version shall be reasonably careful and detailed. This they have done.

Here, then, is that old and comfortable thing the "family" novel. There are two families, one rich and proud and the other poor and proud. And they feud for 40 years. And one generation gives way to another in the progress of the story, which isn't a story at all, rather a plous resolution to the effect that families shouldn't feud. The only drawback to this happy conclusion is that it denies the possibility of a sequel, which most family novelists look forward to.

In Search of Wealth

are the then, there Brodericks, who are rich thrusting Irishmen, and there are the Donovans, who are poor and holty-toity. And the head of the Brodericks digs deep into the ancient hill that lies between them in search of wealth from copper. The head of the Donovans does not approve of this at all.

At intervals during the film somebody comes in to say "There is trouble at the mines" and then there is a free-for-all. And after it has all blown over a Broderick says to a Donovan "You'll get little profit from this night's work."

The film is notable for the faithfully pompous performance of Cecil Parker, the head Broderick, and for the gallant attempt of Miss Margaret Lockwood to grow old before your eyes. Poor lamb, it wasn't easy for

and a bit of Place Vendôme.

> The kind of fly mostly used for these journeys is called the cheese skipper. It's very small and humble, but it knows that some cheeses are richer and better than others, and it lays its eggs in these only.

> The policy of the Government is making life difficult for the cheese skipper, for it refuses lay eggs in factory-made Cheddar on the grounds, perhaps, that it's better to become extinct than bring children into such a hard and unattractive world.

Extinct Cheeses

THEESES themselves become extinct, too. The Banbury cheese is one. It was soft, rich and round, and about an inch

Besides the recently extinct varieties there were prehistoric cheese that developed into those eaten by the ancient Egyptians and the Greeks, and the ones mentioned in the Bible.

No one quite knows who made the first prehistoric cheese, but there's not much doubt about how it happened. Most kinds of cheese are made with rennet the stuff you got from the stomachs of calves and lambs and use for making junket (which is really nothing more than cheese in an early stage). So you can picture the scene quite easily. An early dairy-

The 'Hairdresser & Beauty Trade' circulates among the 35,000 women's hairdressers in Britain. Here is their STYLE OF THE WEEK

A study in reverse curls

 $by \dots HARRY$ COLEMAN

"Hairdresser & Beauty Trade!" Hair Fashion Designerand Superintendent of the General Association of Ladies' Halrdressers.

EVERSE curling" in making frontnage news in the h a i r dressing today. Hairdressers all over Britain to whom I have demonstrated this method have agreed that it is the most revolutionary form of setting ever offered to the public.

is that the hair can be brushed and combed through after the hair has been set.

The more the hair is brushed the deeper the waves become. The waves cannot be brushed out.

No two alike

No finger waving is required, and the length of the hair does not matter.

"Reverse curling" can be used only by competent halrdressers, and therein lies its individuality. No two hair styles need be alike.

is my experience that there are no prevailing fashions in hair styles today. Women are realising that whatever hair arrangement suits their faces and figures is the fashlonable one for them.

Tell the public that if they will allow their hairdresser to shape -not cut-their hair they may have any style they wish.

By following the natural wave or curl of the hair-and even the straightest of hair has a tendency to curl-the formations of. pln curls can be planned.

Styling and arranging the hair come

and curls will predominate in

all hair fashions. Deep sleek waves, sculptured waves, waves that hug the head, waves that will stand up. We must forget the "set" artificial waves that the public and the hairdressing craft have known for years and replace them with 1 waves and "wave movements" which will make the hair appear naturally wavy. 1. Chater Road

Eve Curie now a publisher

dark-haired L daughter of the co-discoverers of radium, has arrived in America for her first postwar visit with a new feather in her cap.

She has become a newspaper publisher in Paris. Miss Curie, in partnership with Philippe Barres, son of the French author Maurice Barres, has been serving as publisher, editor and sometimes special writer for Paris-Presse, an afternoon paper with a circulation of 400,000-second largest in France.

In doing so, she enters, a new phase of a career that has seen her in the guises of concert pianist, music critic, play adapter, lecturer on French problems, war correspondent, member of the Fighting French forces and author of a biography of her famous mother.

"Paris-Presse is completely independent," she explained in an in-terview. "We are not tied to any political party. We have no big banker behind us."

The French press, she said, started from zero after the liberation. The old newspapers had been destroyed through collaboration. It was possible to establish a newspaper without needing "an enormous amount of capital." By a co-operative. arrangement, publishers became "clients" of the printers' co-operative. They were able to use the old newspaper plants without great initial outlay.

Although there still is governmental licensing and control of newsprint, Miss Curie said this is due to scarcity. She believes the controls will vanish with increased

supply. She said, as far as she could obscrve, the government has not used this power to suppress opinion.-

CURIOUS CASE the BEVOLUTIONARY

HERE were many raised eyebrows, both in Fleetstreet and at Westminster, when, two announcements appeared almost simultaneously. One was that the names of the members of the Royal Commission to inquire into the Freedom of the Press would shortly be published. The other was that the Labour Party had in contemplation the establishment of a chain of some 600 newspapers which, between them, would tion, cover the whole country.

Not surprising

■NOR it was a Labour motion which gave rise to the setting up of this Commission, and one of the charges 'n the indictment of the Press made during the Parliamentary_debate_on_this_motion_was that chain-newspapers were inimical to the freedom of the Press and of the journalist alike.

My eyebrows remained immobile. It would be too much to say that I PUT now there is no hope (as of vision which constitutes the tary power, but economic power. whole of my small political capital, I had observed that the world was round, and that it turned on its own axis.

given point in time, something must even say that it has become be upside down. And everything closed shop. sooner or later comes to occupy the position of its opposite....

Attacks bosses

NIO better example of the truth IN of this is to be found than in the history of revolutionary parties. The young revolutionary party begins with a number of attitudes. doctrine, then sooner or later that It is up against the existing order. It is opposed to the Police und to the State. It derides political orthodoxy and attacks religion. It condemns such acts as the deportation of undesirable citizens, and brands "Siberjas" as infamous.

healthy mind may make a sands of helpless members of the and physically on account of the count of their insatiable greed for gain, to the detriment and cruel discomfort of their fellow men. Not only should Government ensure that this wicked extortion should compel the guilty to disgorge their ill-gotten gain by refunding to victims the excess received over the proper and reasonable rent.

The fact that families have to Ing note realise that greed does not Government would be thoroughly it to protect those; who exe out a

More Than Atoms Are Required

Man's age-old dream of harnessing, the elements to prevent killing droughts and devastating floods apparently must await the discovery of forces more powerful even than the atom. This is the conclusion of Dr F. W. Reichelderfer, chief of the U.S. Weather Bureau. It was included in Dr Richelderfer's testimony before a House Appropriations Sub-Commit-

Chairman Karl Stefan asked Dr Reichelderfer what the Bureau was doing to control the weather. Ha said he realised it was preventing serious agricultural losses through its storm warnings but it might do

He inquired specifically about an experiment in which the General Electric Laboratories precipitated snow by dropping dry lee into a cloud at below freezing temperatures. Stefan asked if rain could be produced in drought periods. Reichelderfer said it probably would be possible to clear a small rain cloud. But he said it was unlikely that anyone with information now available could produce a rainstorm on a very big scale. Local And Temporary

"You have enormous masses, of air coming up from the Caribbean, for example, and riding up over a cold wedge of air covering many thousands of square miles," he said "When a system like that gets started it would take a tremendous amount of energy, far more energy through an excessive addiction to than all of the atomic energy produced to date, to modify the process Thus, we know that there is such duce widespread rain or dissolve it. "Locally, you might be able to stop it temporarily, but it would resume

> He-said the Bureau's storm and weather warnings are already preventing losses of about \$2,000,000,000 a year. Expansion of its services, he said, might trim another \$1,000,-000,000 from the annual \$5,000,-000,000 weather toll.-United Press.

the process again and the rain would

CURE FOR CANCER SAID NEAR

Any hour, any day, one may expect an announcement that the cause of cancer has been discovered, said Dr Edward A. Schumann of Philadelphia, in an address to the American Medi-

cal Association. He gave a lecture on the last 100 years of obsteries and gynaecology, such and at the end forecast things to agent in the formation of cancer has

been discovered." He declared no matter what its conceivable that prophylactic guarding of human beings against the formation of cancer may be the rule possibly within a very short time.

"It the cause of this disease is found, there will follow naturally similar discoveries in the genesis of turnours in general, in which case the formation of these neoplasms may be prevented by appropriate measures."

He predicted this would amount to vaccination against cancer and said there also will be vaccination against inflammatory diseases that are caused by bacteria of streptococcus.—Associated Press.

Can't Sass A Fras, Editor Wails

Editor Jack Blanton of the Monroe

County Appeal, is lamenting the absence of sassafras root on the market. The root brawed into a palatable tea is a recognised Missouri antidote for spring fover. In turning down the request of a California woman, Blanton wrote: "Unfortunately, sassafras root no longer comes to the local market.

People seem to have all the money they need and digging, like other forms of work gone out of style. As a result the public's blood goes unpurified and unscientific things like sulfa drugs, penicillin, castor oil and voodog charms are community are suffering mentally being used as unsatisfactory sub-

to save this stuffer

WITHIN a few years of its founding in 1887 the Manufacturers Life expanded into foreign fields. The representatives who pioneered this development were truly "Gentlemen Adventurers"---their search for new avenues of business was an advance into the unknown.

From the nation's viewpoint this expansion was an important step in the development of export trade which at that time was confined to natural products. The sale of Life Insurance abroad is an export of services paid for by the premium payments of foreign policyholders.

In many areas of the world Canadian life insurance companies laid the foundations for our foreign trade and established Canada's reputation for stability and fair dealing. Even to-day there are places where Canada is known principally for its Life Insurance companies.

The Manufacturers Life is proud of the part it has played in this development,-proud, too, of its world-wide reputation for financial strength and the best of Life Insurance service.

Brilliant Referee Returns

BY ARCHIE QUICK

A great boxing referee returned to the ring at the Royal Albert Hall on the night of the Phillips-Famechon fight. He was Sam Russell, the best third man I ever saw in the ring, although Benny Angle ran him close.

I did not see Eugene Corri But 1 rated Russell in front of the Douglases, good as they were. Sam has recently referred at East. bourne, Kingston-on-Thames and

Canterbury to get his hand in, but the Albert Hall was his first London appearance. He was welcome, for we have got all too few good re-

"Most people think that Sam had his licence taken away from him by the Board of Control. That is to answer a charge of vagrancy. not so. He handed it in when he triple matchmaker Stadium Club and the London Club Peggy Bettinson retired.

After that, Sam was manager to Eddle Phillips, and steered the Bow bus driver to the crulserweight championship with three wins over Tommy Farr on the way.

I saw their third and last fight for the title. I shall never forget that night at Mountain Ash Pavilion, South Wales, with 9,000 Welshmen rooting madly for their hero in vain.

Russell, it is interesting to note, was the first non-member of the National Sporting Club allowed to referee a Lonsdale Belt contest and was the first referce ever allowed Len Harvey.

In an Australian court recently Ron Richards, one of the world's best middleweights in the 1930's, faced a charge of vagrancy. Here well-known boxing writer Merv Williams tells.....

The Sad Story Of The Fighter Who Earned £15,000

OW the mighty fall! A few short years ago Ron Richards, an aboriginal glove man held three Australian titles and was the toast of Fistiana. Now he has been sent to Brisbane without one penny of his £15,000 ring earnings left, to be cared for by the Queensland Native Affairs Department.

affairs when the ex-champion appeared before a Sydney court

The charge was eventually waived to the National Sporting Club, the on the gunrantee that Richards would be cared for and given nearly 20 years ago, at the time | home in a settlement set aside by the Government for Aborigines.

> For the time being Richards is phatically "No". with his mother and father in Brisbane, where, they said, they will find him employment and care for

This is a mad end to the story of a great champion. In his halcyon days, Richards would have had a chance with any middleweight in the world. He held middle, light-heavy and heavy titles of Australia at one

The present unfortunate condition of the ex-champion isn't a legacy of

great stars.

FEARED END

Although Richards never said it, I know he feared an end such as has befallen him. Back in about 1936, I was writing his life story, and his time over again. He said crn- ring. He received his glove baptism

ductor back to Walpole's "The Castle of Otranto" or Aphra Behn's "Oroonoko."

And I challenge with all possible vigour the writer of the blurb to make good his boast that "These twenty-three great classics are retold with the simplicity, warmth and wit of the originals."

"The English Townsman," by Thomas Burke.

(Batsford, 12s. 6d.) THOMAS BURKE, who completed

this fascinating book shortly before he died, has this passage:

"Generally, one may say that the country is the right place for children and for the retired. It is not the place for young people. To them, monotony and restricted society is torment. They need the contact of mind and mind; a succession of new interests; spurs to achievement; all those enthusiasms, ephemeral perhaps, which spring up in a city and give mind and spirit their needed food and exercise."

I entirely agree. I would rather live in London's worst slum and never leave it than on some Cumberland fell with a dreary lot of lakes to look at and only Wordsworth's shade for company.

Joe Louis To Tour

Spokane, June 13. Joe Lauis, world heavyweight boxing champion, plans to make an exhibition tour of Europo and Australia next year before he retires from the ring.

This was announced by Fred Sommers, the champion's representative on the current exhibition tour of the western states. No plans have been settled, but Louis is likely to visit Australia before Europe.

Joe Louis will return to New York on July 15 to discuss plans for defending the world title in September.-Router.

WORKERS CONDEMN FRANCO

Prague, June 13. The World Federation of Trade Unions' General Council today unanimously called for the collection of a "solidarity fund" and the organisation of demonstrations to aid the resistance movement in Spain.

The WFTU Vice-President, Louibardo Toledano of Mexico, urged national trade union centres to go further and organise local boycotts of Franco Spain, even though the Council's resolution failed to authorise international boycott.

In corridor discussions, Latin American and Eastern European delegates criticised the resolution as "weak and inadequate" and charged that a stronger resolution had been blocked in the executive committee by the British and American

delegates. The American WFTU Vice-President. Frank Rosenblum, of the Congress of Industrial Organisations, told the United Press: "The American delegation favours the resolution as it now stands. We do not like to drag too many political questions into trade union matters.

French Boycott The French delegate, H. Raynaud, criticised the resolution, saying: "We regret that the example of the CGT (General Confederation of Labour) in persuading the French Government to enforce a boycott has not been generalised. Had it been, Franco might very possibly not be where he is now. We are hoping the general council will take more positive steps towards the final liquidation of Franco."

The Basque workers' representative, Robles-Aranguiz, appealed to the Council "not to forsake your comrades in Spain".

"By their recent strikes," he said, "the Spanish workers have proved that they want to overthrow the tyrannical regime under which they are suffering. The breach which has been opened in the Franco regime As very severe, and we hope more will be opened in the near future. We are against disorder. We are against violence. But I must say our patience has limits."-United Press.

WALLACE BAR SOUGHT

Washington, June 18. The Federal District Court was asked today to bar Mr Wallace, the former Henry States Vice-President, United who is the leading opponent of the present American foreign the Peruvian coast to the South policy, from using the Watergate amphitheatre in Washington for his speech on Monday night.

The American Anti-Communist Lengue brought the netion in the form of a request for a restraining order against the Secretary of the Interior, Mr Julius Krug, whose Department has jurisdiction over the amphitheatre. Court arguments will be heard on

The League's petition cited what is termed Krug's "outright and absolute disregard for the welfare of the people of the United States in granting a permit for the use of public property by a Communist group sponsoring a speaker whose methods incite human emotions towards riot and insurrection"

The motion said that the Southern Conference for Human Welfare, the organisation sponsoring Mr Wallace's speech, had been listed by the House of Representatives Committee in Un-American Activities as among the Communist organisations.—Reuter.

Boundary Commission Talks At Delhi

New Delhi, June 13. The splitting of India under Britain's transfer of power plan moved nearer today when the Viceroy, Lord Mountbatten, discussed the setting up of boundary commissions at a meeting with the "Big Seven" Indian leaders—three from Congress, three from the Moslem League and one Sikh.

Veto Of Berlin Officials

Berlin, June 13. The Allied Control Council decided on Tuesday to permit any one of the four powers in Berlin to veto an elected city dustan and Pakistan. official, it was disclosed today.

The first inkling of the decision Clay last night.

General Clay objected to the interpretation from some Allied quarters that the veto interfered with democratic government. He said it was necessary to insure that no German official was diametrically opposed to the principles of any occupation power.

The American commander maintained that the veto appeared to favour the Russians now because a non-Communist government was in office, but it could work in the other way if the Communists gained control of the Council.

The decision was in direct contrast to policies expounded last year by Maj-Gen Frank Keating, former Berlin military governor, and Frank Howley, director of the Berlin Military Government.

Opponents of The decision said the Western Allies were backing down to the Russlans. General Clay replied that the measure was necessury to prevent another Nazi party from arising in Germany.-United

Senora Peron For London

London, June 13. The Star's columnist, who has, a dally column, "The Stor Man's Diary," interviewed by telephone Senora Eva Peron at Madrid and quoted her as saying: "I am looking forward to visiting London--it will be my first trip. I do not know what my programme will be, but there are lots of things I want to

"I am a woman of the people and I shall share what you have to cat. I am not bringing any special food

"My visit is an unofficial one. According to the columnist: "Madame Peron is bringing a dozen trunks of specially designed clothes and jewellery and said, 'My clothes are nothing special; they are merely fitting for a person of my rank. Franco has entertained me very well indeed. So have all the people here. The General accompanied me on many of my trips.' "-United Press.

EXPEDITION BY RAFT

Washington, June 18. The raft expedition led by Thor Heyerdahl, Norwegian explorer, appeared at about the halfway point in its cruise from Pacific islands near Tahiti. The United States Weather Bureau reported Heyerdahl's latest progress. The report gave the position at midnight GMT Thursday as six degrees 42 minutes South Latitude and 108 degrees 36 minutes West Longi-

The expedition stanted from Peru at about 80 degrees West Longitude, and the islands for which it is heading lie just west of 130 degrees. Thus the expedition appears to be on schedule because Heyerdahl estimated the cruise would take four months, and they are now halfway after slightly less than seven weeks. The latest message reported favourable wind, good visibility, with scattered clouds in the sky, a low swell from the southeast, temperature 79 degrees and a drift southwest from one to three knots.-United Press.

SEARCH FOR NEW WAR WEAPON

(Continued from Page 1) A protolype of the Brabazon airliner, the world's greatest aircraft, which will shortly take the air, is also a key to the overall plan. A military version of this mammoth plane could be refuelled in the air, bombard any part of the world and return to its distant base.

The role of India in this Commonwealth strategic plan is obscure

Commissions for the Punjab, Bengal and Sylhet (the Moslem majority district of Assam) were discussed, a communique stated, as well as arrangements for liaison with Indian states; the avoidance of administrative disorganisation when paramountcy lapses, and the setting up of a tribunal to arbitrate on boundary disputes.

Pressing For Information On Hungary

London, June 13. Mr Ernest Bevin was to day considering official proposals on the best methods of carrying out the assurance given yesterday by Mr Hector McNeil, Minister of State, in the House of Commons that Britain would continue to press the Soviet Government for full information on the Hungarian crisis.

Though no now instructions | Certain members of the opposition have been despatched to Sir have even been released lately, it Maurice Peterson, the British is stated, among them Victor Slavescu, a prowar Cabinet minister,—Reuter. most probable course is that he will shortly be required to deliver a further protest to M. Vyucheslav Molotov about the Soviet attitude in Budapest, coupled with a funther appeal for a Three Power investigation of the alleged conspiracy which had led to the fall of the government of Ferenc Nagy, the former Hungarian Premier.

The statement made yesterday by oday when the Netherlands Mr McNell is interpreted here as meaning that Britain will make one further attempt to secure Allied cooperation in the handling of the Hungarian situation before falling and the West Borneo Council back on more drastic measures, such But the Government is also considering to make it clear that Britain will not acquiesce in an interpretation of Allied rights and duties by which receipt of confessions from the arrested Hungarian' politician, Beln Kovnes, is not considered interference in the domestic situation, wherens a request by a fellow member of the Allied Control Commission -Britain or the United States-to Monday to make its final decision be allowed to read the evidence is

It is now felt that more is at stake The spokesman could not give any than the future of the Hungarian information about the possibility of Government and that to permit such the Commissioners having informal a reading of the armistice terms discussions with Dr Sutan Sjahrir, would destroy the future of the Great Power co-operation in Europe The Indonesian delegation met for at the very time when the US Sedue to have before it for approval two hours in Batavia this morning, cretary of State, General George the reports of two of its most im- No official statement was issued, but Marshall, has made it clear that this

Events In Rumania

London, June 13. The National Liberal Party of George Tatarescu, the Rumanian Foreign Minister, is conducting discussions with the other parties of Rumania's ruling conlition National Democratic Front to clear up points of difference, but a serious government crisis is improbable, it was learned today from a reliable source. The discussions are proceeding on the basis of the memorandum submitted by Tatarescu, asking for "elucidation" of certain items in the joint programme on which the Na-Commander in South East, Asia tional Democratic Front contested last November's general election. Tatarescu's Party stands for bank-

ing and business interests and the rights of private property. The other main three parties of the coalition-Communists, Social Democrats and the Groza Front Party-natural-But in splite of the obvious differ-The Japanese were accused of ences, a serious conflict between the government parties is not exprected at least so long as the Red Army remains in Rumania.

Arrests of lesser members of the protested because the War Crimes opposition parties have been continuing for several months past, but did not seem to have been intensified recently as part of the general drive against—the oppositions—of-Eastern Europe.
